SEAL

DIRECTION: Read the following passage and then answer the questions based on what is stated or implied in the passage.

The greatest enemy of mankind, as people have discovered, is not science but war. Science merely reflects the prevailing social forces. It is found that, when there is peace, science is constructive; when there is war science is perverted to destructive ends. The weapons which science gives us do not necessarily cause war; they make war increasingly terrible. Till now, it has brought us to the doorstep of doom. Our main problem, therefore, is not to curb science but to stop war – to substitute law for force, and international government for anarchy in the relations for one nation with another. That is a job in which everybody must participate, including the scientists. But the bombing of Hiroshima suddenly woke us up to the fact that we have very little time. The hour is late and our work has scarcely begun. Now we are face to face with an urgent question – “can education and tolerance, understanding and creative intelligence run fast enough to keep us abreast with our own mounting capacity to destroy”? That is the question which we shall have to answer one way or the other in this generation. Science must help us in arriving at the answer, but the main decision lies within ourselves.

1. According to the writer, the real enemy of mankind is not science but war because
 - (a) Science merely invents the weapons with which war is fought.
 - (b) Science during wars becomes destructive.
 - (c) The weapons that science invents necessarily lead to war.
 - ☒ (d) The weapons invented by science do not cause war but these make war more destructive.
2. War can be stopped if
 - (a) science is not allowed to lead us to utter destruction.
 - ☒ (b) we replace force and lawlessness by law and international government.
 - (c) science is restricted to be utilized only during war time.
 - (d) weapons invented by science are not used to launch a war.
3. According to the writer the main problem we are faced with is to
 - (a) stop science from reflecting social forces.
 - (b) stop scientific activities everywhere.
 - ☒ (c) abolish war.
 - (d) prevent scientists from participating in destructive activities.
4. Our mounting capacity to destroy can be kept under control by
 - (a) encouraging social forces
 - (b) education and broadmindedness
 - (c) insight and constructive thinking
 - (d) both b and c (as above) together
5. The expression ‘bring to the doorstep of doom’ means –
 - (a) Carry close to death and destruction.
 - (b) Lead to the threshold of a new destiny.
 - (c) Indulge in ruinous activities.
 - (d) Introduces to an unpredictable destiny.
6. Which of the following is not implied in the passage ?
 - (a) People needlessly blame science for war.
 - (b) Science is misused for destructive purposes
 - (c) Neither science nor the weapons it invents add to the horrors of war
 - (d) The role of science in ensuring peace in the world is subsidiary to that of man.

7. Which of the following is opposite in meaning to the word 'anarchy' in the middle of the passage?
- (a) Order (c) Economic prosperity
(b) Political dominance (d) Communal harmony
8. The expression 'keep us abreast' in the passage means –
- (a) Keep at a distance (c) Hold out a challenge
(b) Keep side by side (d) Prevent from escaping
9. The expression 'our work has scarcely begun' means that our work
- (a) has not yet begun (c) has been half-way through
(b) has only just begun (d) has begun but not yet completed
10. Which of the following would be the most suitable title for the passage ?

DIRECTION: The passage given below is followed by a number of questions with answer choices marked a, b, c, d. Select the appropriate answer choice against each question.

The goals of our present system of primary and secondary schooling is to prepare students for the examination system which will take them to the best technical institutions in the country. While the teaching of science and mathematics has over the years been upgraded, the teaching of humanities and social sciences continues to be straight-jacketed in grotesque ways. Those areas of the Indian reality which ought to form proper subject like the caste, poverty and environmental degradation, if we are to create a body of responsible and aware citizens, form no part of syllabus. To enhance the capacity of the students to think adequately and critically about the problems that plague the modern Indian society ought to have been given a prominent place in the humanities curriculum but it is perceived to be intractable from the point of view of examiner. Lest the evaluation should become subjective, every effort is made to reduce both history and economics to a series of facts. A one-to-one correlation between facts ensured proper system of grading.
